

Syncing windows 2003/2008 server to a NTP server

On the windows server, open a command shell:

```
C:\> Net Time /queryntp (This should report time.windows.com)
```

```
C:\> Net Time /setsntp:NTPserver.yourdomain (where NTPserver.yourdomain is the NTP server of your choice)
```

```
The command completed successfully.
```

```
C:\> net stop w32time
```

```
The Windows Time service is stopping.
```

```
The Windows Time service was stopped successfully.
```

```
C:\> net start w32time
```

```
The Windows Time service is starting.
```

```
The Windows Time service was started successfully.
```

```
C:\> w32tm /config /update
```

```
Sending resync command to local computer...
```

```
The command completed successfully.
```

```
Check the time and you should see that the time has been updated.
```

```
C:\> w32tm /resync
```
