Jul 9, 2008

What a sensational waste of a working iPhone. For anyone that hasn't seen this series on YouTube, BlendTec are a company that make Blenders.

An excellent example of using Social Websites to advertise a product, they have posted a series of video blogs where they ask the question "Will it blend?" before blending various things from iPhones to pens, chicken and coke (and drink it) lighters, rakes, the bailout plan, Germany.. etc

*See what the Total Blender can do in the Blendtec test lab, as we ask the question, Will It Blend?*
